# protonet

or

How you are going to sozialise in the future.

Existing Social Networks

- World wide connections but barely local impact.
- Data privacy is not taken seriously.
- User data is sold to marketing companies.
- Owned by profit making companies.
- Heaps of pointless information.
- Closed source software - depending on what the company is going to do with their product.

- Feature restricted software.
- Dependent on internet connection.
- Can be shut down by governments.

But What Do People Want?

- Freedom of speech.

- Access to all kinds of information.

- Privacy.

- Connect with people they care about.

- Make a difference.

- Give meaning.

- Have recognizable impact.

- Share information.

- Be local.

The Real Social Network

protonet
it's yours

- Brings back locality.
- Connects you with people around you.
- Distributed responsibility.
- (De-) Centralized infrastructure.
- Share everything you like easily.
- Make an impact.
- Comes with full-fledged infrastructure.
- Independent from internet providers.
- Cannot be shut down.

- owned by YOU
